SETTLE IN.

[THIS IS OUR WHISKY+ WHISKEY MENU.]

THERE can be up to 500 bottles of whisk(e)y from around the world on our bar at any one time. You may not find all of our whisk(e)y in this menu so strike up a conversation with your bartender to see what unicorns may be lurking behind closed doors.

All pours are 30ml and are served with your choice of spirit tasting glass or rocks glass, with ice and spring water on the side. 15ml pours are available on request - ideal for sampling.

Whisk(e)y can be purchased by the bottle to be stored here at no cost for your next visit. Ask your bartender for the extended bottlekeep menu.

If you are looking for an introduction to Whisk(e)y ask us how to get started.

SCOTLAND.

Scotch whisky (Scottish Gaelic: uisge-beatha na h-Alba) is malt whisky or grain whisky made in Scotland.

Although only five Scottish whisky regions are specifically recognized by the Scotch Whisky Association (SWA), any Scottish locale may be used to describe a whisky if it is distilled entirely within that place

THE HIGHLANDS.

The Highlands is the largest of the whisky producing regions in Scotland. Due to the vastness of the region, Highland whiskies often taste very different from each other, from the extreme heathery, spicy character of Northern Highlands to the fruity whiskies of the Southern Highlands.

LOWLANDS.

There are only three operating distilleries remaining in the Lowlands, at the southernmost part of Scotland. Whisky from this region is generally considered the most light bodied of the Single Malts.

Although the Speyside region is geographically part of the Highlands, it is considered a separate region because of its unique characteristics. The region received its name from the river Spey, which cuts through the area. Many of the distilleries use water straight from the river Spey in their production process. Speyside whisky is thought to be the country's most complex, and is known for sweetness and elegant flavors and aromas.

ISLANDS.

Though not considered by all as a region of its own, whisky from the Islands can be described as a milder version of Islay whisky (almost like a hybrid between Highland and Islay whiskies).

Here you'll also find our collaboration with Melbourne specialty spirits store Casa De Vinos; an independent bottling of an Orkney Island single malt whisky aged for 13 years in an ex-bourbon barrel. It's a beautiful balance of savory and sweet, something we're very proud of. Have a taste and see if you can figure out the famous distillery the liquid came from!

ISLAY.

Pronounced “eye-luh”, Islay whisky is considered to be the smokiest and strongest-flavored of the single malts. Their strong flavor is due to the region’s abundance of peat, and exposure to the high winds and seas of the west coast.

CAMPBELTOWN.

Once the whisky capital of Scotland, there are only three distilleries remaining in Campbeltown. The Whisky here has a briny character with hints of peat and salt.

IRELAND.

.....

For an industry that, until recently, had only three operational distilleries, Irish whiskey offers a richly varied array of styles and production methods. Double distillation, triple distillation – and a unique style of pot still whiskey that owes its genesis to a tax dodge.

JAPAN.

Japan largely follows Scottish conventions for making whisky. In contrast to the strict rules surrounding what can be classified a Scotch or a bourbon, Japanese whisky has only one: it must be made in Japan. Japanese whiskies tend to have a lighter and sweeter profile, they also differ according to the locations of their distilleries much like their Scottish counterparts.

Although Japanese whisky has been produced for nearly a century, it wasn't until the Yamazaki Single Malt Sherry Cask 2013 took home the title of World's Best Whisky in 2015 that heads turned and attitudes changed—even in Japan.

USA.

For one thing, it's not just bourbon. There's rye, Tennessee, corn, and more recently, other, unofficial styles from microdistilleries cropping up everywhere from New York to Michigan to California. American variety can be much more approachable than its counterparts - it's noticeably sweeter, not as smoky, and for the most part, less expensive. Generally, American whiskey is made up of a mixture of corn, rye, wheat, and barley (collectively referred to as the mash) and is aged in charred-oak barrels, but each variety has its own characteristics.
